

BREAKING BARRIERS:

Bridging Quality & Infection Control

Different Perspectives • One Shared Goal
Safer Patient Care

8 October 2026
Thursday

10:00 AM – 1:00 PM
3 Hours

Shamseya Office
Offline / In-Person

E-Certificate
Upon Completion

KEY OBJECTIVES

By the end of the workshop, participants will be able to:

1

Spot the Risk

Identify and prioritize Hospital Quality & Infection Control risks.

2

Bridge the Gap

Connect clinical practice, quality, and accreditation requirements.

3

Build the Solution

Apply practical improvement tools to address system gaps.

4

Make an Impact

Turn a real hospital challenge into a practical improvement project.

MAIN OBJECTIVE

To bridge the gap between Quality and Infection Control by bringing healthcare professionals together to identify real-world patient safety risks, assess them collaboratively, and develop practical, system-based improvement projects.
